

## Storage Instructions for Power Grid

*Important: Always store the Wind Turbine in the case with the **blades up**. Handle this model with utmost care*

1. Unplug the USB B cable from the Power Grid and your computer and twist tie the cable.
2. Unplug the 5 volt DC power from the Power Grid case twist-tie the cable.
3. Unplug each USB C cable from the Power Grid case but leave connected to the model.
4. Remove each model from the metal surface by tipping it slightly and then lifting it up.
5. Unplug each USB C cable from the model.
6. Twist-tie the 5 USB C cables together.
7. Open the Power Grid case and place each model in its corresponding compartment.
  - a. Important: **Store the wind turbine with the blades facing up**. Do not force them down into the foam. When storing the Wind Turbine, **the model's blades should be facing up**
  - b. The Power Plant should be stored in the Left-Front square hole with **the cooling tower laying down**.
8. Place the power supply in its corresponding compartment on the left side and its cable in the opening in the back left.
9. Place the 5 USB C cables and the 1 USB B cable in the compartment in the back.
10. Close the cover of the Power Grid case and snap the clasps closed. Be sure these are securely closed.

Store the Power Grid components as in the picture above
